

# George Settleman

Berkeley, CA gsettleman@berkeley.edu (415) 747-9473 linkedin.com/in/georgesettleman

## EDUCATION

### University of California, Berkeley

Expected May 2027

*B.A. Applied Mathematics & B.A. Data Science*

Berkeley, CA

Relevant Coursework: Data Structures & Algorithms, Principles of Data Science, Artificial Intelligence, Multivariable Calculus, Abstract Algebra, Computational Structures, Abstract Linear Algebra, Numerical Analysis

## EXPERIENCE

### Pfizer

Summer 2026

*Machine Learning Intern (Incoming)*

La Jolla, CA

### VRChat

Jan 2026 – Present

*Technical Lead*

Remote

- Leading the development of vrchat.com

### Certis Oncology

Sep – Dec 2025

*Full Stack Developer*

Remote

- Built scalable ML pipelines on AWS Lambda and S3 for predictive analytics
- Engineered data workflows to visualize millions of rows of model output
- Designed and implemented a RAG chatbot for internal research data

### Web Development at Berkeley

Sep 2025 – Present

*Project Manager & Tech Lead*

Berkeley, CA

- Previously served as Full Stack Developer (Sep – Dec 2025)

## PROJECTS

### Plan My Transfer

3,000+ users

A web app helping California community college students navigate the complex transfer process to UC and CSU schools. Designed a database with comprehensive documentation based on over 400,000 transfer documents.

React, Node.js, MongoDB, Express

### Binged It

Personal Project

A movie and TV show tracking app with metadata for 2.4M+ titles, built with modern web technologies.

Next.js, PostgreSQL, Supabase, React Query

### Movement - Decentralized Crowdfunding

Best Use of Sui — CalHacks 2025

A blockchain-based crowdfunding platform where contributors vote on milestone-based fund releases.

Sui, Move, Next.js, TypeScript

## SKILLS

**Frontend:** React, Next.js, TypeScript, Tailwind CSS

**Languages:** TypeScript, Python, Java, SQL

**Backend:** Node.js, PostgreSQL, MongoDB, AWS, Supabase, Sentry

**Tools:** Git, Jupyter, Figma
